## LANGUAGES & TECHNOLOGIES

---

**Core stack:** JavaScript, Node, React, TypeScript, GraphQL, Redux, Relay, MySQL, DynamoDB, Docker

**Additional tools:** CSS styled-components, Zeplin, Storybook, Jira

## WORK EXPERIENCE

---

### Rotaready - The Access Group

Full-Stack Software Engineer

New York & London, UK

June 2022 - present

- Helped design and launch a suite of applications, achieving a 15% improvement in workforce management efficiency over 6 months for over 40,000 employers and employees.
- Co-engineered core product features, which resulted in a 25% user retention increase by rolling out a new dashboard, events calendar, and a new version of the rota software.
- Spearheaded the migration of the entire front-end to TypeScript, reducing bugs by 20% and accelerating development cycles.
- Exceeded expectations in The Access Group's 'Path to Great' program, meeting all goals ahead of time resulting in a promotion in under six months.

Skills used: [React](#), [Redux](#), [Relay](#), [GraphQL](#), [TypeScript](#), [Node](#), [JavaScript](#), [Git](#), [Zeplin](#), [Jira](#), [MySQL](#), [DynamoDB](#), [Docker](#)

### Absolute Magnitude

Full-Stack Software Developer

Remote

October 2021 - July 2022

- Delivered 5+ high-quality client solutions over 10 months, achieving 100% client satisfaction and ensuring optimal functionality across various websites.
- Led and coordinated the team, consisting of a backend developer and a designer, to craft 5 major React-based projects, meeting all deadlines and receiving commendations for exceptional client communication.

Skills used: [React](#), [Node](#), [JavaScript](#), [Git](#), [AWS](#), [Figma](#)

### Nomader

Full-Stack Software Developer

London, UK

June 2021 - September 2021

- Independently conceptualized, developed, and deployed "Nomader," a full-stack application, which resulted in a 5% increase in the time it takes to make travel bookings by leveraging Skyscanner's open-source API for currency and flight deals.

Skills used: [React](#), [Node](#), [Express](#), [REST APIs](#), [Axios](#), [Send in Blue](#), [MySQL](#), [Heroku](#), [Web Hosting](#), [JavaScript](#), [Figma](#)

## PROJECTS

---

### Children's Literacy Hackathon

London, *UK*

The teams were tasked with creating a web app to make children's learning interactive and fun. They could take any approach they wanted and had to present their creative solution to the judges by 5 p.m. that same day.

### Code-Pairing Supplemental Program

London, *UK*

As an initiator in my software engineering program, I saw an opportunity for all students to work together outside of class in a code pairing program. Each week, I assigned a student to a new person to work with, to learn how to collaborate, see how other students write code, and help each other out with difficult problems.

## EDUCATION & CERTIFICATIONS

---

### Advanced Full-Stack Software Engineering Training

London, *UK*

[The Jump Digital School](#)

### BA International Business && BA Business Marketing

Long Beach, *CA*

California State University Long Beach

## LEISURE ACTIVITIES

---

**Coding:** regularly attending advanced React meetups, an active member of the livecode.nyc discord channel, and a mentee and mentor in the Meet a Mentor (MaM) program

**Experiential event curation:** creating memorable experiences through music, art, dancing, and connection

**Traveling:** visited over 60 countries, spent one year (2019 - 2020) as a digital nomad

**Scuba diving:** the Great Barrier Reef, Montenegro, the Caribbean, Bermuda
